BASIC-ABSTRACT:

NOVELTY - A hair curler adaptor which has a range of curl sizes has a series of coaxial sections in a staggered array and sliding inside each other, and with

the whole system fitted onto a conventional electric heating element. The longitudinal grooves (2) on the outside of each section are gripped by ridges moulded to the inside of each section. The sections are stabilised by wider rear collars (3).

USE - Hair curling

ADVANTAGE - A versatile adaptor which produces curls of different sizes without changing the adaptor

DESCRIPTION OF DRAWING(S) - The drawing shows a side view of an adaptor.
